

## JDBC Deleting Row

### Example

```
//import sql package
import java.sql.*;

public class DeleteDemo {
    public static void main (String [] args) throws Exception {
        //define variables
        String driver = "oracle.jdbc.driver.OracleDriver";
        String url = "jdbc:oracle:thin:@localhost:1521:xe";
        String user = "system";
        String pass = "system";
        String sql = "DELETE FROM cricketers WHERE jersey=7";

        //load the driver
        Class.forName(driver);

        //establish connection
        Connection con = DriverManager.getConnection(url, user, pass);

        //creating statement
        Statement st = con.createStatement();
        st.executeUpdate(sql);
    }
}
```
