# Scenario 1 :- No Security

```java
class Bank
{
        int amt = 10000;
}

class Hero
{
    public static void main(String args[])
    {
        Bank b = new Bank();

        System.out.println("Amount = "
                    + b.amt);
    }
}
```

```java
class Villain
{
    public static void main(String args[])
    {
        Bank b = new Bank();

        System.out.println("Amount = "
                    + b.amt);
    }
}
```

Output :- Executing Hero class

| Amount = 10000 |

Output :- Executing Villain class

| Amount = 10000 |
